

COURSE OL1010

**Course Title :** Self Paced Conventional Panel Training

**Training Institute :** G2 Fire ([www.g2fire.co.za](http://www.g2fire.co.za))

**Format :** Online Self Paced  
- Optional Practical Assessment

**Venue : Online with Practical at:**

- G2, Kya Sand, Johannesburg

### **Description**

This is a SAQCC certified course which when passed can be used towards the 'Installer' accreditation of the SAQCC. The course covers both the theory and practical aspects of installing the Ziton ZP1 and Aritech 1X products and associated field hardware to create a full working Conventional Fire Detection system. This is a self paced on-line course where the candidate can attend a practical assessment to gain their SAQCC supplier training 1 certification.

### Course Topics

- Wiring a Zone
- Wiring a Sounder Circuit
- Use of basic tools
- Testing the circuits before connecting the panel
- Mounting the Panel
- Terminating the Circuits
- Connecting Batteries and Mains
- Commissioning System
- Sounder Delays
- Remote Inputs
- Handing over System – including end user routine tests
- Service and Maintenance

**Price : FREE**  
- Optional Practical Assessment R350 incl. VAT (required for certificate for SAQCC)

**External Accreditation :** SAQCC Supplier Training 1
